ELDERVALE · OWNER ACCESS

The Owner's Manual

Game console & admin control centre

Managing players, building the world, shaping NPCs and monsters, and running the realm — a step-by-step guide for the owner, with reference tables and every command.

Release `release-20261105-cap99v62` · Written 5 November 2026

12. Tips and troubleshooting 34

12.1 What this guide could not verify 35

1. Getting started

The Eldervale **Game console** is the owner's control centre for the live, shared world. Everything you do in it is saved on the server immediately and seen by every player. This manual walks through each tab in plain language, then gives reference tables, every typed command, and troubleshooting tips.

◆ 1.1 Who can use it: owner and moderators

Eldervale has exactly one **owner** account. The server recognises it by a fixed account ID built into the database functions; it cannot be handed over from inside the game. The owner can promote ordinary players to **moderator** (and demote them) from the Players tab.

	Owner	Moderator	Player
Button in the game	♛ Game console	♜ Moderation	—
Window title	Game console · ELDERVALE · OWNER ACCESS	Moderation center · MODERATOR ACCESS	—
Tabs	All 15 tabs (see 1.3)	Players and Terminal only	—
Kick, mute, unmute	Yes (60 s – 1 year)	Yes, mute up to 24 hours, never other staff or the owner	—
Ban / unban	Yes	No	—
Remove chat, resolve reports	Yes	Yes	—
Build, spawn, edit NPCs/monsters, items, gold, XP, world settings, roles	Yes	No — the server refuses with “This command requires owner access”	—
Allowed into the world during maintenance	Yes	No	No

◆ 1.2 Opening and closing the console

1. Sign in to Eldervale with the owner account and wait for the world to load. A gold-bordered ♛ Game console button appears near the top-left of the screen (moderators see ♜ Moderation).
2. Click the button, or press F8 on the keyboard. F8 toggles the console open and closed.
3. Pick a tab from the left-hand menu. The owner console opens on Dashboard; the moderator console opens on Players.
4. Close it with the × in the top-right corner, or press F8 again.

The header also has an Owner guide link that opens the built-in web handbook (`/owner-guide.html`) in a new tab.

❧ PLACING THINGS BY CLICKING

Buttons ending in "…" such as **Place by clicking…** temporarily close the console and show a prompt at the top of the screen. Left-click the ground to choose the spot; the console reopens afterwards. Press `Esc` to cancel.

◆ 1.3 Console layout

The owner's left-hand menu is grouped into five headings:

Group	Tabs	What they are for
Live	**Dashboard** **Players** **Reports**	Realm overview and quick actions; manage individual players; read player reports and recent chat.
Build	**Spawn** **Placed** **Editor**	Add new things to the world; move/rotate/resize/delete what is already placed; the classic all-fields editor with import/export.
Population	**NPCs** **Monsters** **Actors**	Edit NPC dialogue, shops, looks and movement; tune monsters and loot; control every actor including the original town residents.
Game	**Items** **Recipes** **Quests**	Item library and custom items; profession recipes; quest builder.
Server	**World** **Audit** **Terminal**	Messages, maintenance, restart, start point, travel; the action history; the typed command terminal.

The strip along the bottom of the console is the **status line**. While a button is working it reads "Saving *command*…", then "Saved *command* to the server." If something goes wrong, the server's error message appears there in red.

◆ 1.4 Safety rules built into the console

- **The server always re-checks.** Hiding a button is not the protection: every owner command is checked again on the server, which refuses anyone who is not the owner ("Owner access required").
- **Everything is audited.** Each change is written to an audit log with who did it, when, and the record before and after. Open **Audit** to read the latest 100 actions or export them as a JSON file.
- **One command at a time.** If you click again while a command is still saving you will see "Wait for the current command". Just wait a second and retry.
- **Deleting is recoverable.** Deleted placed objects, NPCs and monsters go to **Placed → Deleted**, where **Restore** brings them back.
- **Confirmations** are shown before Kick, Ban, Delete group and Reset every creature.
- **World capacity.** The server holds at most 2,000 active placed entities; above that it refuses new spawns ("World limit: archive an entity first").

⚠ CHANGES ARE LIVE

There is no “draft” world. Spawns, edits and grants take effect for everyone straight away. For big rebuilds, switch on **maintenance** first (World tab) so other players are kept out while you work.

◆ 1.5 Coordinates and places

Positions in Eldervale are given as **X** (east–west) and **Z** (north–south, where “North” in the console means smaller Z). Valid coordinates run from −4,500 to 4,500. To see your own position, type `/coords` in chat (see section 11). The console's built-in travel buttons go to:

Place	X	Z
Birchford	−234	140
Eldervale Castle (southern approach)	−340	−237
Winterwatch	217	−230
Emberspire	257	226
Birchford farm	−275	132

2. Dashboard tab

The Dashboard is a live overview. Its numbers refresh about every five seconds while the tab is open.

Tile	Shows
Players online	Characters connected in the last 15 seconds.
Monsters	Living monsters, plus how many are defeated and waiting to respawn.
NPCs	Living NPCs (residents and traders).
Placed entities	Saved world objects you (or earlier builders) placed.
Ground drops	Items currently lying on the ground.
World status	Open, or Maintenance; also says “restart scheduled” during a countdown.

Quick actions

Button	What it does
Heal everyone online	Restores every connected player to full health. Reports how many were healed.
Respawn defeated creatures	Brings back every defeated NPC/monster at full health at its home spot.
Clear drops within 40 m	Deletes all ground drops within 40 m of you.
Start maintenance / **End maintenance**	Toggles maintenance mode (see World tab).

Broadcast to all players

1. Type the message (up to 1,000 characters).
2. Set **Minutes** (1–240; default 10).
3. Click **Broadcast**. The message appears as a banner at the top of every player's screen for that long.

Travel buttons teleport you to the five places in section 1.5. **Recently placed** lists your last six placements; click one to open it in the Placed tab.

3. Players tab

Lists every saved character. A green dot means online, grey means offline. Each row shows level, health (online only) and tags such as *banned*, *muted* or *moderator*.

◆ 3.1 Finding a player

1. Open **Players**. Online players are listed first, then everyone else alphabetically.
2. Type part of a name (or account ID) into **Search players...**.
3. Click the player. Their details and tools appear on the right: level, position and gold (when online).

> ❧ **OFFLINE PLAYERS**
> You can act on offline players. Gold, items, XP and teleports are queued and applied when they next log in.

◆ 3.2 Movement and health

Button	Effect
Go to player	Teleports you to 2 m beside the player (they must have a world position).
Bring to me	Teleports the player to your position.
Heal	Restores the player to full health.
Teleport player	Enter X and Z (pre-filled with your position) and send the player there. Coordinates must be within ±4,500.

◆ 3.3 Giving gold and items

1. In the **Give** box choose the **Item** (first entry is **Gold coins**).
2. Enter the **Amount** (1 – 1,000,000 per grant).
3. Choose **To**: **Inventory** or **Bank**. Gold always goes to the purse, whatever you choose.
4. Click **Give**. The status line confirms “Gave ... to *name*”.

- Equipment (weapons, armour, clothing, shields, jewellery, the mount) is always granted **one at a time**.
- The backpack has **16 slots**. If the grant would overflow it the server refuses with “Inventory full...”: send it to the bank instead.
- Some tools are *unique*: a player can only carry one, so extra copies must go to the bank.
- A player's gold can never exceed **1,000,000,000**, and an item stack cannot exceed 1,000,000,000.

◆ 3.4 Max out a player

Max out: all skills 99 + 1B gold is a one-click “god mode” for testing or rewards. For the selected player it:

- raises **every** skill (7 combat + 15 profession skills) to at least 480,200 XP — level 99 (skills never lose XP they already had above that);
- **sets** gold to exactly 1,000,000,000 (it replaces their balance, it does not add);
- recalculates combat level — which becomes **100** because Attack, Strength, Defence, Ranged and Magic are all 99 — and fully heals them.

The status line then reads, for example, "Maxed out: combat level 100, 1,000,000,000 gold." There is no confirmation dialog and no undo button, but the before-values are kept in the audit log.

◆ 3.5 Experience and skill levels

1. Choose a `Skill` from the list (Attack … Prayer, then the professions).
2. To **add** experience, enter an `XP` amount (1 – 5,000,000 per grant) and click `Give XP`. A skill's total XP is capped at 13,000,000.
3. To **set** a level directly, enter `Set level` and click `Set level`. This replaces the skill's XP with the exact amount for that level.

Levels and combat level. Skills cap at **99**. Level from XP is 1 + ⌊√(XP ÷ 50)⌋, so level 99 needs 480,200 XP. Combat level is the average of Attack, Strength and Defence (1–99), and becomes **100 only when Attack, Strength, Defence, Ranged and Magic are all 99**.

> **? NOT VERIFIED**
> The server's level range for `Set level` was tightened to 1–99 for the six newest profession skills (Mining, Woodcutting, Fletching, Runecrafting, Construction, Hunter). For the other skills the older server path may still accept 100, but the game treats any skill above 99 as 99. Use 1–99.

◆ 3.6 Moderation: kick, mute, ban

1. In `Moderation`, type a `Reason` — **required**, 3–500 characters, even for unmute and unban.
2. Choose a `Duration`: 10 minutes, 1 hour, 1 day, 1 week, 30 days or 1 year (used by mute and ban).
3. Click `Kick`, `Mute`, `Unmute`, `Ban` or `Unban`. Kick and Ban ask for confirmation.

Action	What the player experiences
Kick	Disconnected within a few seconds with "Removed by the owner: *reason*". They may sign in again.
Mute	Cannot send chat until the duration ends ("Chat is muted until …").
Ban	Disconnected with "Access suspended: *reason*" and cannot enter until the ban ends.
Unmute / Unban	Lifts the mute or ban immediately.

You cannot moderate yourself. Moderators can only kick, mute (up to 24 hours) and unmute, and can never target the owner or another moderator.

3.7 Staff roles

1. Select the player.
2. In **Staff role** choose **Moderator** or **Player**.
3. Click **Save role**. The new moderator sees the **♜ Moderation** button after reloading the game.

3.8 Reports tab (player reports and chat)

Reports (under Live) shows the older combined view: a moderation form with a player drop-down, all **player reports** (open/resolved, with reporter and target) and the **recent world chat**. Click **Resolve** to close a report or **Remove message** to delete a chat line. Players file reports with the “Report a player” button at the bottom of their screen.

4. Spawn tab: adding things to the world

Spawn is a searchable catalogue of everything that can be placed: 412 entries across nine categories. Everything you spawn is **saved permanently for every player**.

Category	Entries	Contains
Buildings	26	Castle keep, Castle keep, Timber cottage, Timber cottage, Stone townhouse, Stone townhouse, Timber inn, …
NPCs	36	White Knight, Town resident, Town guard, Royal banker, Traveling merchant, Ironworker, Woodland ranger, …
Monsters	29	Ironhide ogre, Fallen revenant, Road bandit, Goblin raider, Restless skeleton, Hill troll, Stone guardian, …
Animals	7	Red deer, Wild boar, Forest bear, Giant rat, Cave bat, Grey wolf, Marsh spider
Decor	25	Canvas traveler's tent, Straw and wool bedding, Fallen-log seat, Cooking pot and tripod, Supply wagon, Trail signpost, Stacked firewood, …
Stations	24	Construction work site, Smelting furnace, Smithing anvil, Carpenter's workbench, Spinning wheel, Tanning rack, Grain mill, …
Terrain	6	Settlement plaza, Path segment, Grass terrain, Sandy terrain, Stone terrain, Snow terrain
Farm	15	Timber fence, Farm hut, Chicken coop, Hay bale, Water trough, Scarecrow, Wheelbarrow, …
Items	244	Every built-in item (plus live custom items)

4.1 Choosing what to spawn

1. Open Spawn. Click a category chip (or All).
2. Optionally type in the search box — every word must match (e.g. *stone furnished*). At most 240 cards are shown; refine the search if you see "Showing 240 of …".
3. Click a card. The right-hand panel shows a rotating 3-D preview, and for creatures their level, health, damage, attack style, behaviour, respawn time and loot.

4.2 Placing it

Adjust the options, then press one of the three placement buttons:

Option	Meaning
Name	Custom name (single pieces only, up to 80 characters).
How many	Monsters only: 1–12. Several are arranged in a ring around the spot.
Level override	Monsters only: 1–100. Health and XP reward scale with the level ratio, damage with its square root.
Heading °	Facing direction in degrees (steps of 15). For groups it rotates the whole layout.

Button	Where it goes
Spawn in front of me	4 m ahead of you (14 m for multi-piece groups), facing you.
Spawn at my feet	Exactly where you stand, using your current heading.
Place by clicking...	Closes the console; left-click the ground to place. Esc cancels.

> ✦ INDOORS
> When you spawn something while standing inside a building, it is placed on your current floor of that building (except whole buildings, which always go outdoors).

◆ 4.3 Buildings: furnished or unfurnished

The Buildings chips offer each house type twice — **Furnished** (with interior furniture) and **Unfurnished** (empty shell) — plus a furnished **Farmhouse** (a larger timber cottage), the plain Cottage / Bank / Inn / Forge templates and castle walls, towers and gates. To change stories, room types or stone walls afterwards, use Placed → Edit all fields (section 9.1). A building is only a building: a bank building does not create a banker NPC, and a forge building is not a working furnace or anvil — add those separately (Stations, NPCs).

◆ 4.4 Decorations, objects, stations and terrain

- **Decor** — camp props, crates, barrels, chests, benches, lanterns, trees, boulders, banners, ruins, flower beds and statues.
- **Stations** — working skilling stations (furnace, anvil, workbench, spinning wheel, patches, altars, fishing spot, market stall, well ...). Fishing spots must be within 6 m of water.
- **Terrain** — plaza, path segments and grass/sand/stone/snow terrain patches. Terrain patches must be on dry land and at least 15 m clear of buildings. Their radius (2–30 m), elevation (−8 to +8 m), and path length/width are set in the Editor tab.

◆ 4.5 Items: inventory, bank or ground

1. Choose Items and click an item card. The panel shows its description.
2. Enter a Quantity (1 – 1,000,000; equipment is always 1).
3. Choose: Add to my inventory, Send to my bank, Drop at my feet, or Place by clicking.

"Drop" and "Place" create a permanent item pickup in the world (it appears in Placed → Items). These owner-placed pickups are different from ordinary player drops, which expire. To give items to *another* player, use the Players tab.

◆ 4.6 NPCs, monsters and farm animals

NPCs offers the NPC templates plus ready-made presets (e.g. "merchant with starter stock", "stationary guard", the camp personas). Monsters offers the raw monster templates and the **bestiary** cards, which come with tuned stats, XP/gold rewards and loot tables and are tagged with a tier (Common, Veteran, Elite,

Boss, Legendary). `Animals` holds wildlife; `Farm` holds livestock (cow, hen, sheep, pig) and farm buildings. Bestiary creatures spawn set to *wander*. After spawning, fine-tune them in the NPCs or Monsters tab.

◆ 4.7 Bundles and groups

Bundle cards spawn several pieces at once as one **group** that moves, rotates and deletes together (up to 80 pieces per bundle):

Bundle	Description	Pieces	Contents
Complete farm	Hut, cow pen, chicken run, hay, trough and scarecrow in a 16 m square.	39	Farm hut, Flower bed, Wheelbarrow, Hay bale, Scarecrow, 26× Timber fence, Water trough, 2× Dairy cow, Woolly sheep, Chicken coop, 3× Hen
Cow pen	An 8 m fenced paddock with two cows and a trough.	18	15× Timber fence, Water trough, 2× Dairy cow
Chicken run	A 6 m run with a coop and three hens.	15	11× Timber fence, Chicken coop, 3× Hen
Sheep fold	A paddock with three sheep and hay.	19	15× Timber fence, Hay bale, 3× Woolly sheep
Haunted graveyard	Ruined walls with zombies and a skeleton warrior.	7	2× Ruined wall, Stone statue, 2× Rotting zombie, Ghoul, Skeleton warrior
Orc war camp	Tents, a campfire and an orc warband.	7	2× Canvas traveler's tent, Campfire, Timber weapon rack, 2× Orc grunt, Orc warchief

Manage a group from any of its pieces in `Placed` (section 5.4).

5. Placed tab: editing what is in the world

5.1 Finding a placed entity

1. Open **Placed**. Filter with the chips **All**, **Objects**, **NPCs**, **Creatures**, **Items** or **Deleted**.
2. Search by name, template, group name or ID. Keep **Nearest first** ticked to sort by distance (shown in metres). Up to 200 rows are listed.
3. Or click **Select in world**, then click the object in the 3-D world. Esc cancels.
4. Click a row; it is highlighted in the world and its tools open on the right.

5.2 Move, rotate and resize

Control	Effect
0.5 m **1 m** **5 m** **10 m**	Step size for the arrow pad (and group moves).
North **West** **East** **South**	Nudge one step. North = −Z, East = +X.
↺ 90° **↺ 15°** **↻ 15°** **↻ 90°**	Rotate.
Smaller **Bigger** **Reset size**	Scale by ×0.85 / ×1.15 (limits 0.25–5) or back to 1.
Move to my position	Moves it to where you stand (and onto your floor if indoors).
Move by clicking…	Click the new spot in the world.
Teleport there	Takes you to it.
Edit all fields	Opens the classic Editor with every field (section 9.1).
Open in NPCs / **Open in Monsters**	Jumps to the full NPC or monster editor.

5.3 Delete and restore

Delete removes the entity for everyone straight away (no confirmation). To undo, choose the **Deleted** chip, select it and press **Restore**.

5.4 Groups

When the selected piece belongs to a group, a **Group** card appears showing how many pieces move together:

Button	Effect
Group N **Group W** **Group E** **Group S**	Move the whole group one step.
Group ↻ 90°	Rotate the whole group around its centre; NPC patrol routes move along with their NPC.

Button	Effect
`Group to me`	Move the group's centre to your position.
`Delete group`	Deletes every piece (asks for confirmation).

The server limits a single group move to 500 m and rotation to 360°.

? NOT VERIFIED

The server also supports restoring a deleted group in one step, but the console has no button for it. Restore deleted pieces individually from `Placed → Deleted`.

6. NPCs tab: dialogue, trading, looks and behaviour

Lists every placed NPC, nearest first, with its role and distance. Search by name or role, or press `Spawn a new NPC`. Click an NPC to open its editor. **Nothing is saved until you press** `Save NPC`; `Discard changes` reloads the saved version.

6.1 Header actions (save immediately)

Button	Effect
`Go to`	Teleport next to the NPC.
`Respawn / reset`	Full health, back at its home spot.
`Freeze` / `Unfreeze`	Pause or resume its movement and combat.
`Move by clicking...`	Click a new home spot; a patrol route moves with it.
`Delete`	Removes it (restore from Placed → Deleted).

6.2 Identity and service

`Name` (up to 80 characters) and `Service`: Dialogue only, Merchant (opens shop), Banker, Guard, Smith, Mage, Healer, Farmer, Innkeeper or Ranger. Banker opens the shared bank and Merchant opens the shop; the other services use existing game behaviour and labels — choosing one does not invent new scripted abilities.

6.3 Editing dialogue

1. In `Dialogue`, each numbered box is one page the player sees when they click the NPC (up to 400 characters per line).
2. `Add line` adds a page; `↑` moves a line up; `×` removes it.
3. Press `Save NPC`. All lines together may be up to 2,000 characters.

6.4 Trading and shop stock

1. Tick `This NPC trades with players` (this also sets Service to Merchant).
2. Press `Add stock item` for each product, pick the item and set `Buy` (what the player pays, at least 1), `Sell` (what the player receives; must be at or below Buy) and `Stock` (−1 = unlimited).
3. `Remove` deletes a row. Press `Save NPC`.

A shop can hold up to 40 items; prices up to 1,000,000; stock up to 1,000,000. Limited stock is shared between all players and its price floats between 65% and 150% as people buy and sell. Saving a merchant resets its supply to the quantities you entered.

6.5 Look

Choose **Body** (automatic/male/female), **Skin** (6 tones), **Hair** (Short parted, Buzz cut, Cropped, Long, Buns, Bald), **Hair colour** (6 shades), **Beard**, **Outfit** (Matches role, Plain, Peasant, Knight armour, Wizard robes, Noble attire, Ranger leathers) and **Outfit colour** (1–3). "Automatic" lets the game choose.

6.6 Behaviour: stationary, wander or patrol

Mode	Setup
Stationary	Stays on its spot (best for bankers, shopkeepers, guards at gates).
Wander	Roams randomly within **Wander radius** (1–50 m) of home.
Patrol route	Walks a loop through 2–12 waypoints in order. Add points with **Add my position** or **Add by clicking...**; **Remove** or **Clear** to edit. Every waypoint must be within 45 m of the NPC's home spot.

6.7 Combat

Open the **Combat** section to set **Level** (1–100), **Health** (1–100,000) and **Can be attacked**. An NPC that cannot be attacked is never aggressive (the server enforces this).

7. Monsters tab: stats, aggression, respawn and loot

Lists placed creatures with level, species and distance (and “defeated” if waiting to respawn). Filter chips: **All**, **Aggressive**, **Peaceful**, **Livestock**. Click one to edit. A health bar shows its live HP and whether it is in combat. The header buttons are the same as for NPCs (Go to, Respawn / reset, Freeze, Move by clicking..., Delete).

◆ 7.1 Stats

Field	Range	Notes
Name	up to 80 characters	
Level	1 – 100	Combat level shown to players.
Health	1 – 100,000	Maximum HP.
Damage	0 – 10,000	Maximum hit.
Seconds per attack	1.3 – 30	Lower is faster.
Respawn seconds	0 – 86,400	0 = never respawns.
Size	0.25 – 5	Visual scale.
XP reward	0 – 100,000	Given to the player who lands the final blow (default 30).
Gold reward	0 – 1,000,000	Default 8 for aggressive creatures, 2 for peaceful ones.
Attack style	slash, punch, stab, hammer, arrow, magic, bite, kick, charge, claw, venom, swoop, slam, fire	Animation and effect used.
Aggressive to nearby players	tick box	Attacks players who come close.
Can be attacked	tick box	Untick for an invulnerable creature.

◆ 7.2 Loot tables

1. In **Loot table**, press **Add drop** (up to 8 rows). Each row: item, **Min**, **Max** (1–1,000), **Chance %** (above 0, up to 100).
2. For bestiary species, **Use *creature* loot** copies the standard table.
3. **×** removes a row. Press **Save creature**.

Each row is rolled separately when the creature dies; successful rows fall to the ground for the player who landed the final blow. A player who already has 100 or more items lying on the ground gets no further loot until they collect some. Gold and XP rewards still apply when the table is empty.

7.3 Behaviour

Same choices as NPCs: Stationary, Wander (radius 1–50 m) or Patrol route (2–12 waypoints within 45 m of home).

8. World tab: server-wide controls

Section	Control	What it does / limits
Messages	**Save welcome**	Text shown to every player when they log in (up to 1,000 characters).
Messages	**Broadcast now**	Banner for all players; text 1–1,000 characters, 1–240 minutes.
Server	**Start maintenance (owner only)** / **End maintenance**	Maintenance disconnects everyone except the owner with “Eldervale is in maintenance mode. Please try again later.” and keeps them out until you end it. A “MAINTENANCE · Owner building session” banner shows.
Server	**Start countdown** / **Cancel countdown**	Restart countdown of 15–3,600 seconds. Players see “World restart in Ns — progress will be saved.”; at zero each game saves the character and reloads. It does not reboot the web host or database.
Population	**Heal everyone online**	Full health for all connected players.
Population	**Respawn defeated creatures**	Revives only creatures that are currently defeated.
Population	**Reset every creature**	After confirmation, every NPC and monster returns home at full health.
Population	**Clear drops near me**	Removes ground drops within the radius you enter (1–500 m; default 40).
New characters	**Use my position as the new-character start**	Sets where brand-new characters appear. Must be a walkable spot within ±419 on X and Z. Existing characters keep their saved positions.
Travel	Place buttons, **Teleport me**	Jump to a named place or to typed X / Z coordinates.

✦ A SAFE REBUILD ROUTINE

1. Broadcast a warning (e.g. 10 minutes).
2. Start maintenance.
3. Build and test.
4. End maintenance and update the welcome message.

9. Advanced and classic tabs

◆ 9.1 Editor (classic World Studio)

The original all-fields editor. Left: a filterable list of saved entities, `New entity`, `Select in world`, `Export world` and `Import world JSON`. Right: the form.

- `Quick setup` pre-fills a building, NPC or camp prop preset; `Template` lists every template and item.
- Fields: Name, World X/Z, Heading °, Scale; `Turn left/right 45°`, `Face North/East/South/West`, `Small/Standard/Large/Grand size`.
- **Buildings** (cottage, bank, inn, forge): `Stories`, `Upper-floor room` and `Third-story room` (Bedrooms, Hall, Chapel, Armory, Workshop), `Stone walls`, `Furnished interior`, and for cottages `Interior layout`.
- **NPCs / monsters**: level, health, damage, seconds per turn, roam radius (0–50 m), respawn, attack style, can be attacked, aggressive, dialogue, service and a shop-stock editor.
- **Trees**: logs produced (normal/oak/willow/maple/yew), regrowth 15–3,600 s, min/max logs. **Boulders**: ore type. **Terrain**: radius 2–30 m, raise/lower −8 to +8 m. **Walls/gates**: length 6–50 m. **Paths**: length 2–50 m, width 1–8 m. **Construction sites**: `Reset this building site`.
- Buttons: `Spawn at coordinates`/`Save changes`, `Place with world click`/`Move with world click`, `Use my position`, `Teleport here`, `Clone` (copy 3 m away, then save/place it), `Delete`/`Restore`, `Preview attack`.

> **⚠ IMPORT ADDS, IT DOES NOT REPLACE**
> `Export world` downloads all active placed entities as `eldervale-world.json` — keep these as layout backups. `Import world JSON` **adds** the file's entities (max 200 entities, 2 MB), so importing an existing layout duplicates it.

◆ 9.2 Actors

Every NPC and monster, including the **original town residents** (IDs beginning `base:`) that do not appear in Placed. Per actor: `Go to`, `Delete`/`Restore`, `Respawn`, `Freeze`/`Unfreeze`, and `Edit combat and behavior` (level 1–100, max HP, damage, seconds per attack, roam radius, respawn, attackable, hostile → `Save actor`).

◆ 9.3 Items

The **item library**: search by name/ID, filter by category, set `Quantity` (1–1,000,000) and use `Add to inventory`, `Send to bank` or `Place in world`. Below it is the **custom item editor** for new trade goods and healing consumables: unique ID (`custom_lowercase_name`, 2–35 characters after the prefix), display name (2–60), description (up to 300), appearance, world drop model, buy price (1–1,000,000), sell price (0 to buy), heals HP (0–100; 0 = trade good) and stackable. `Save item` publishes it to everyone; pick an existing custom item to edit it (its ID stays valid). Up to 200 custom items. New 3-D equipment or scripted abilities need development work.

◆ 9.4 Recipes

Edit an existing profession recipe or create one: ID, name, skill, station (or inventory), required level, XP per action, seconds per action, enabled; lists of ingredients (consumed), products and tools (kept); and, where relevant, resource respawn, fire lifetime, crop growth/harvest settings, success chance (0.05–1) and burn chance (0–0.95). Bank notes cannot be used as ingredients, products or tools. **Save recipe** applies it for every player.

◆ 9.5 Quests

The quest builder: choose the NPC who gives the quest (place an NPC first), name, dialogue/description, objectives (**Collect and return items**, **Defeat enemy**, **Talk to NPC**, with target and quantity), rewards (gold, items, XP per skill) and **Published (players can accept)**. **Preview quest**, **Save quest**, **Unpublish quest**. Players who already accepted a quest keep its original objectives and rewards.

◆ 9.6 Audit

The latest 100 owner actions, newest first, each expandable to show the record before and after. **Export audit** downloads them as `eldervale-audit.json` — useful for recovering something changed by mistake.

◆ 9.7 Terminal

A typed command line inside the console. It accepts **game commands only** — not JavaScript, SQL or shell commands. Every command is validated and audited on the server. Type `help` for the list. All commands are documented in section 11.1.

10. Reference tables

10.1 Limits at a glance

What	Limit
Give items / gold (per grant)	1 – 1,000,000; equipment one at a time
Player gold balance	max 1,000,000,000
Item stack / bank quantity	max 1,000,000,000
Backpack	16 slots (bank: no slot limit)
Give XP (per grant)	1 – 5,000,000; total per skill max 13,000,000 XP
Skill level	1 – 99 (level 99 = 480,200 XP)
Combat level	1 – 99; 100 only with Attack, Strength, Defence, Ranged and Magic all 99
Max out button	every skill ≥ level 99; gold set to 1,000,000,000; full heal
Mute / ban duration	owner 60 s – 1 year (console menu: 10 min – 1 year); moderator mute ≤ 24 h
Moderation reason	3 – 500 characters (always required)
Broadcast	1 – 1,000 characters, 1 – 240 minutes
Welcome message	up to 1,000 characters
Restart countdown	15 – 3,600 seconds
Clear drops radius	1 – 500 m
Coordinates	X and Z within ±4,500
New-character start	within ±419, walkable
Active placed entities	2,000
Bundle size / group move	1 – 80 pieces; move ≤ 500 m; rotate ≤ 360°
Monsters per spawn	1 – 12
Level (console)	1 – 100 (classic Editor accepts up to 999 for new spawns)
Health / damage	1 – 100,000 / 0 – 10,000
Seconds per attack	1.3 – 30
Respawn	0 – 86,400 s (0 = never)
Roam / wander radius	0 – 50 m (wander: 1 – 50)
Patrol	2 – 12 waypoints, each ≤ 45 m from home

What	Limit
Scale / size	0.25 – 5
Loot table	≤ 8 rows; quantity 1 – 1,000; chance > 0 – 100%
XP / gold reward per kill	0 – 100,000 / 0 – 1,000,000
Name / dialogue	80 characters / 2,000 characters (400 per line in the NPC editor)
Shop	≤ 40 items; buy 1 – 1,000,000; sell 0 – buy; stock −1 (unlimited) – 1,000,000
Custom items	≤ 200; heal 0 – 100 HP
World import	≤ 200 entities, ≤ 2 MB
Terrain patch / path / wall	radius 2–30 m, elevation −8 to +8 m / length 2–50 m, width 1–8 m / length 6–50 m

◆ 10.2 Buildings

Card	Variant	Key
Castle keep	Furnished	`castle_keep_furnished`
Castle keep	Unfurnished	`castle_keep_empty`
Timber cottage	Furnished	`timber_home_furnished`
Timber cottage	Unfurnished	`timber_home_empty`
Stone townhouse	Furnished	`stone_home_furnished`
Stone townhouse	Unfurnished	`stone_home_empty`
Timber inn	Furnished	`timber_inn_furnished`
Timber inn	Unfurnished	`timber_inn_empty`
Stone bank	Furnished	`stone_bank_furnished`
Stone bank	Unfurnished	`stone_bank_empty`
Stone smithy	Furnished	`stone_smithy_furnished`
Stone smithy	Unfurnished	`stone_smithy_empty`
Grand stone hall	Furnished	`great_hall_furnished`
Grand stone hall	Unfurnished	`great_hall_empty`
Stone chapel	Furnished	`chapel_furnished`
Stone chapel	Unfurnished	`chapel_empty`
Stone armory	Furnished	`armory_furnished`
Stone armory	Unfurnished	`armory_empty`
Farmhouse	Furnished	`farmhouse_furnished`

Card	Variant	Key
Castle curtain wall	—	`castle_wall`
Castle round tower	—	`castle_tower`
Castle great gate	—	`castle_gate`
Cottage	—	`cottage`
Bank	—	`bank`
Inn	—	`inn`
Forge	—	`forge`

10.3 Decor, stations, terrain and farm objects

Category	Entries
Decor	Canvas traveler's tent, Straw and wool bedding, Fallen-log seat, Cooking pot and tripod, Supply wagon, Trail signpost, Stacked firewood, Coiled hemp rope, Hanging camp lantern, Trestle table, Wooden stool, Timber weapon rack, Supply crate, Oak barrel, Treasure chest, Town bench, Street lantern, Campfire, Oak tree, Pine tree, Boulder, Town banner, Ruined wall, Flower bed, Stone statue
Stations	Construction work site, Smelting furnace, Smithing anvil, Carpenter's workbench, Spinning wheel, Tanning rack, Grain mill, Runecrafting altar, Farming patch, Hunting ground, Balance log, Practice thieving stall, Training lock chest, Wild herb patch, Flax patch, Wheat patch, Berry bush, Essence rock, Prayer altar, Cooking hearth, Fishing spot, Town fountain, Market stall, Stone well
Terrain	Settlement plaza, Path segment, Grass terrain, Sandy terrain, Stone terrain, Snow terrain
Farm	Timber fence, Farm hut, Chicken coop, Hay bale, Water trough, Scarecrow, Wheelbarrow, Dairy cow, Hen, Woolly sheep, Farm pig, Complete farm, Cow pen, Chicken run, Sheep fold

10.4 NPC templates

Template	Default name	Role	Lvl	HP	Dmg	Attack	Movement
`white_knight`	White Knight	guard	45	240	20	slash	stationary
`villager`	Town resident	resident	5	45	4	punch	3 m
`guard`	Town guard	guard	20	110	12	slash	3 m
`banker`	Royal banker	banker	5	45	4	stab	stationary
`merchant`	Traveling merchant	merchant	5	45	4	stab	stationary
`smith`	Ironworker	smith	5	45	4	hammer	stationary
`ranger`	Woodland ranger	ranger	12	70	8	arrow	3 m
`mage`	Ember scholar	mage	18	65	13	magic	3 m
`healer`	Temple healer	healer	5	45	5	magic	stationary
`knight`	Royal knight	guard	35	180	19	slash	3 m

Template	Default name	Role	Lvl	HP	Dmg	Attack	Movement
`farmer`	Field keeper	farmer	5	45	4	slash	3 m
`innkeeper`	Innkeeper	innkeeper	5	45	4	punch	stationary
`trail_warden`	Trail warden	guard	60	320	24	slash	stationary
`camp_outfitter`	Camp outfitter	merchant	5	45	4	stab	stationary
`woodsman`	Woodsman	resident	5	45	4	slash	stationary
`herbalist`	Traveling herbalist	merchant	5	45	4	stab	stationary
`camp_cook`	Camp cook	merchant	5	45	4	slash	stationary
`scout`	Woodland scout	resident	5	45	4	stab	stationary
`pilgrim`	Dawn pilgrim	resident	5	45	4	punch	stationary
`wagoner`	Caravan wagoner	resident	5	45	4	slash	stationary
`wayfarer`	Resting wayfarer	resident	5	45	4	slash	stationary
`camp_storyteller`	Camp storyteller	resident	5	45	4	stab	stationary

NPC presets in the Spawn tab: dialogue resident, merchant with starter stock, banker, stationary guard, Trail warden, Camp outfitter, Woodsman, Traveling herbalist, Camp cook, Woodland scout, Dawn pilgrim, Caravan wagoner, Resting wayfarer, Camp storyteller.

◆ 10.5 Bestiary: 25 tiered creatures

Ready-made creatures with tuned stats, rewards and loot. Tier colours match the console's tier badges.

Creature	Tier	Region	Lvl	HP	Dmg	Respawn	XP	Gold	Aggr.	Loot (qty · chance)
Hen	Peaceful	Farmland	1	8	1	30 s	3	0	No	Feathers ×3–8 · 100%, Hen egg ×1 · 40%, Raw game meat ×1 · 50%
Dairy cow	Peaceful	Farmland	2	40	1	45 s	6	0	No	Raw game meat ×1–2 · 100%, Animal hide ×1 · 80%
Woolly sheep	Peaceful	Farmland	2	30	1	45 s	5	0	No	Soft fur ×1–2 · 100%, Raw game meat ×1 · 60%
Farm pig	Peaceful	Farmland	3	35	2	45 s	5	0	No	Raw game meat ×1–3 · 100%, Animal hide ×1 · 50%
Goblin scout	Common	Forest camps	6	34	4	45 s	20	6	Yes	Traveler's rations ×1 · 35%, Copper ore ×1–2 · 30%, Feathers ×2–6 · 40%
Grey wolf	Common	Woodlands	7	38	5	40 s	22	0	Yes	Raw game meat ×1 · 60%, Soft fur ×1 · 50%
Marsh spider	Common	Wetlands	11	48	8	45 s	35	4	Yes	Thread ×1–3 · 50%
Bandit thug	Common	Roadsides	12	70	8	60 s	45	18	Yes	Lockpick ×1 · 15%, Traveler's rations ×1–2 · 40%, Iron dagger ×1 · 6%
Rotting zombie	Common	Graveyards	12	90	9	50 s	40	8	Yes	Raw game meat ×1 · 30%, Herb seeds ×1–3 · 25%, Linen cloth ×1 · 20%

Creature	Tier	Region	Lvl	HP	Dmg	Respawn	XP	Gold	Aggr.	Loot (qty · chance)
Cinder imp	Common	Amber wastes	13	55	8	60 s	40	10	Yes	Fire rune ×3–8 · 60%, Coal ×1–2 · 30%
Skeleton warrior	Common	Crypts and ruins	16	80	11	60 s	60	14	Yes	Iron ore ×1–2 · 35%, Iron longsword ×1 · 5%, Air rune ×3–8 · 30%
Skeleton archer	Common	Crypts and ruins	18	68	12	60 s	65	15	Yes	Iron arrows ×5–15 · 60%, Arrow shafts ×5–10 · 40%, Feathers ×3–8 · 30%
Dire wolf	Veteran	Frozen north	20	130	13	90 s	85	0	Yes	Brown fur pelt ×1 · 60%, Raw game meat ×1–2 · 80%
Ghoul	Veteran	Graveyards	22	150	15	90 s	95	22	Yes	Grimy herb ×1–3 · 50%, Fire rune ×4–10 · 25%, Healing draught ×1 · 15%
Orc grunt	Veteran	War camps	24	170	15	75 s	110	30	Yes	Iron bar ×1–2 · 30%, Iron battleaxe ×1 · 5%, Leather ×1–2 · 40%
Night wraith	Veteran	Ruins	28	125	18	120 s	150	35	Yes	Air rune ×5–15 · 60%, Rune essence ×2–6 · 40%
Goblin warlord	Elite	Forest camps	18	150	12	180 s	120	40	Yes	Iron scimitar ×1 · 8%, Healing draught ×1–2 · 50%, Uncut sapphire ×1 · 20%
Giant spider	Elite	Deep forest	30	280	20	240 s	220	60	Yes	Thread ×4–10 · 80%, Uncut sapphire ×1–2 · 30%, Healing draught ×1–2 · 30%
Cave troll	Elite	Mountains	34	300	22	180 s	260	70	Yes	Coal ×2–5 · 60%, Mithril ore ×1–2 · 25%
Ogre brute	Elite	Mountains	38	320	24	200 s	300	80	Yes	Steel nails ×5–15 · 50%, Iron bar ×2–3 · 40%
Stone golem	Elite	Highlands	45	380	27	300 s	450	90	Yes	Adamantite ore ×1–2 · 35%, Coal ×3–6 · 60%
Orc warchief	Boss	War camps	40	420	26	300 s	400	120	Yes	Steel bar ×2–4 · 50%, Iron war axe ×1 · 10%, Cut sapphire ×1 · 20%
Ash demon	Boss	Amber wastes	50	600	30	600 s	700	200	Yes	Fire rune ×20–40 · 80%, Runite ore ×1–2 · 25%, Cut sapphire ×1–2 · 40%
Ember dragon	Boss	Dragon peaks	75	900	38	900 s	1500	500	Yes	Runite bar ×1–2 · 30%, Cut sapphire ×2–4 · 60%, Ember staff ×1 · 5%
Elder dragon	Legendary	Dragon peaks	100	3000	55	1800 s	5000	2000	Yes	Runite bar ×3–6 · 70%, Crimson claymore ×1 · 10%, Bloodthorn bow ×1 · 8%

? NOT VERIFIED

The task brief mentioned 26 monster types. The code defines **25** bestiary creatures (21 monsters and 4 livestock) and **24** base creature templates (table below); these overlap. No list of exactly 26 was found.

10.6 Base creature templates

Template	Name	Category	Lvl	HP	Dmg	Attack	Aggr.	Respawn	Spawn card
`demon`	Ash demon	Monsters	50	420	29	claw	Yes	30 s	Via bestiary card
`imp`	Cinder imp	Monsters	13	55	8	fire	Yes	30 s	Via bestiary card
`ogre`	Ironhide ogre	Monsters	38	300	24	slam	Yes	30 s	Own card
`revenant`	Fallen revenant	Monsters	42	260	26	magic	Yes	30 s	Own card
`bandit`	Road bandit	Monsters	12	65	8	stab	Yes	30 s	Own card
`goblin`	Goblin raider	Monsters	8	42	6	slash	Yes	30 s	Own card
`skeleton`	Restless skeleton	Monsters	16	75	11	slash	Yes	30 s	Own card
`wolf`	Grey wolf	Monsters	7	38	5	bite	Yes	30 s	Via bestiary card
`deer`	Red deer	Animals	4	32	4	kick	No	30 s	Own card
`boar`	Wild boar	Animals	9	55	7	charge	No	30 s	Own card
`bear`	Forest bear	Animals	22	140	15	claw	No	30 s	Own card
`rat`	Giant rat	Animals	2	18	2	bite	No	30 s	Own card
`spider`	Marsh spider	Monsters	11	48	8	venom	Yes	30 s	Via bestiary card
`bat`	Cave bat	Animals	5	25	4	swoop	No	30 s	Own card
`troll`	Hill troll	Monsters	32	240	21	slam	Yes	30 s	Own card
`golem`	Stone guardian	Monsters	45	360	27	slam	Yes	30 s	Own card
`wraith`	Night wraith	Monsters	28	125	18	magic	Yes	30 s	Via bestiary card
`dragon`	Ember dragon	Monsters	75	850	38	fire	Yes	30 s	Via bestiary card
`zombie`	Rotting zombie	Monsters	14	90	9	claw	Yes	30 s	Via bestiary card
`orc`	Orc warrior	Monsters	24	160	14	slash	Yes	30 s	Own card
`cow`	Dairy cow	Farm	2	40	1	kick	No	45 s	Via bestiary card
`chicken`	Hen	Farm	1	8	1	swoop	No	30 s	Via bestiary card
`sheep`	Woolly sheep	Farm	2	30	1	charge	No	45 s	Via bestiary card
`pig`	Farm pig	Farm	3	35	2	charge	No	45 s	Via bestiary card

“Via bestiary card” means the template is spawned through the bestiary card of the same name, which adds rewards and loot.

10.7 Items

244 built-in items (bank-note versions are hidden from lists), plus any custom items you create. Use the **Terminal** command `items` for every item ID.

Category	Count	Items
Equipment	131	Iron battleaxe, Iron dagger, Iron scimitar, Iron longsword, Iron 2h sword, Iron shortsword, Bronze pickaxe, Iron axe, Bronze sword, Bronze axe, Iron war axe, Iron hammer, Iron spear, Gilded sword, Iron warhammer, War scythe, Crimson claymore, Wooden bow, Longbow, Gilded bow, Bloodthorn bow, Apprentice staff, Sapphire staff, Amethyst staff, Ember staff, Iron armet helm, Gilded armet helm, Blacksteel armet helm, Iron horned helm, Gilded horned helm, Blacksteel horned helm, Iron breastplate, Gilded breastplate, Blacksteel breastplate, Iron gambeson, Gilded gambeson, Blacksteel gambeson, Iron gauntlets, Gilded gauntlets, Blacksteel gauntlets, … and 91 more (weapons, armour sets, robes, shields, jewellery, cape, mount)
Materials	23	Ashes, Timber plank, Oak plank, Bronze nails, Steel nails, Thread, Animal hide, Leather, Flax, Bow string, Arrow shafts, Feathers, Headless arrows, Iron arrowtips, Unstrung bow, Uncut sapphire, Cut sapphire, Empty vial, Vial of water, Burnt food, Hunter bait, Soft fur, Steel reinforcement
Food	17	Red apple, Orchard pear, Forest berries, Sweet orange, Garden carrot, Farmhouse cheese, Cooked lobster, Cooked shrimp, Cooked salmon, Traveler’s rations, Roast chicken, Berry pie, Cheese pizza, Vegetable soup, Fresh bread, Roast game meat, Cooked river fish
Trade goods	17	Linen cloth, Wool blanket, Brown fur pelt, Hemp rope, Beeswax candle, Travel lantern, Wool bedroll, Traveler’s journal, Sealed letter, Wooden bucket, Leather work gloves, Iron arrows, Handcrafted shortbow, Silver signet, Mithril fittings, Adamantite fittings, Runite fittings
Tools	13	Matches, Tinderbox, Smithing hammer, Crafting knife, Needle, Chisel, Carpenter’s saw, Rake, Seed dibber, Spade, Pestle and mortar, Box trap, Lockpick
Ores	10	Iron ore, Copper ore, Tin ore, Coal, Silver ore, Gold ore, Mithril ore, Adamantite ore, Runite ore, Rune essence
Ingredients	8	Field mushroom, Hen egg, Red berries, Wheat, Flour, Water flask, Bread dough, Raw game meat
Bars	8	Bronze bar, Iron bar, Steel bar, Silver bar, Gold bar, Mithril bar, Adamantite bar, Runite bar
Fishing & logs	5	Fishing pole, Fishing net, Fishing bait, Raw river fish, Logs
Timber	4	Oak logs, Willow logs, Maple logs, Yew logs
Herbs	2	Grimy herb, Clean herb
Potions	2	Unfinished remedy, Healing draught
Seeds	2	Herb seeds, Wheat seeds
Runes	2	Air rune, Fire rune

◆ 10.8 Skills and XP keys

XP keys are used by the `setskill` terminal command.

Skill	XP key	Type
Attack	`attackXP`	Combat
Strength	`strengthXP`	Combat
Defence	`defenceXP`	Combat
Hitpoints	`hitpointsXP`	Combat
Ranged	`rangedXP`	Combat
Magic	`magicXP`	Combat
Prayer	`prayerXP`	Combat
Mining	`miningXP`	Profession
Woodcutting	`woodXP`	Profession
Fishing	`fishingXP`	Profession
Firemaking	`firemakingXP`	Profession

Skill	XP key	Type
Smithing	`smithingXP`	Profession
Cooking	`cookingXP`	Profession
Crafting	`craftingXP`	Profession
Fletching	`fletchingXP`	Profession
Herblore	`herbloreXP`	Profession
Farming	`farmingXP`	Profession
Runecrafting	`runecraftingXP`	Profession
Construction	`constructionXP`	Profession
Hunter	`hunterXP`	Profession
Agility	`agilityXP`	Profession
Thieving	`thievingXP`	Profession

11. Command reference (“terminal commands”)

◆ 11.1 Console Terminal tab

Open **Terminal** (owner: Server group; moderator: second tab), type a command and press **Run** or `Enter`. Words are separated by spaces. Player IDs are account UUIDs — get them with `players` or from the Players tab search; actor IDs from `actors`. The result is printed as text below. An unrecognised word gives “Unknown command. Type help.”

Command	Syntax	What it does	Who	Example
help	`help`	List the commands	Owner, moderator*	`help`
where	`where`	Show your position (x, z, heading, floor, building)	Owner	`where`
items	`items`	All item IDs and names	Owner	`items`
recipes	`recipes`	All recipe IDs, skills, levels and XP	Owner	`recipes`
recipe	`recipe recipeID`	One recipe in detail	Owner	`recipe <id from recipes>`
stations	`stations`	Placed skilling stations with IDs and coordinates	Owner	`stations`
skills	`skills`	Profession skill names and XP keys	Owner	`skills`
templates	`templates`	All template IDs and names	Owner	`templates`
actors	`actors`	Every actor ID and position	Owner	`actors`
players	`players`	Player IDs, names and online status	Owner, moderator	`players`
quests	`quests`	Quest definitions and IDs	Owner	`quests`
quest_archive	`quest_archive questUUID`	Unpublish a quest	Owner	
castle	`castle`	Teleport to Eldervale Castle (−340, −237)	Owner	`castle`
spawn	`spawn template x z [level hp]`	Spawn a template, optionally overriding level and HP	Owner	`spawn goblin -230 150 12 80`
announce	`announce message`	Banner for 10 minutes	Owner	`announce Server restart at 20:00`
welcome	`welcome message`	Set the login welcome message	Owner	
restart	`restart seconds`	Start a restart countdown (15–3,600)	Owner	`restart 120`
cancel_restart	`cancel_restart`	Cancel the countdown	Owner	`cancel_restart`
maintenance	`maintenance on|off`	Toggle maintenance mode	Owner	`maintenance on`
give	`give itemID amount [playerUUID]`	Give items or gold (to inventory). Without a player ID it goes to you.	Owner	`give healingPotion 5`
teleport	`teleport x z [playerUUID]`	Teleport yourself or a player	Owner	`teleport -234 140`
bring	`bring playerUUID`	Bring a player to you	Owner	`bring 1b2c…-uuid`

Command	Syntax	What it does	Who	Example
heal	`heal [playerUUID]`	Full heal (yourself if no ID)	Owner	
goto	`goto actorID`	Teleport next to an actor	Owner	
delete / restore	`delete actorID` · `restore actorID`	Delete or restore an actor	Owner	
respawn	`respawn actorID`	Reset an actor's health and position	Owner	
freeze / unfreeze	`freeze actorID` · `unfreeze actorID`	Pause / resume an actor	Owner	
setnpc	`setnpc actorID hp|level|damage|attackSpeed|roam|respawn value`	Change one actor stat	Owner	`setnpc <actorID> level 40`
setskill	`setskill playerUUID skillXPkey level`	Set a skill level (1–99)	Owner	`setskill 1b2c…-uuid attackXP 60`
role	`role playerUUID moderator|player`	Grant or remove moderator	Owner	`role 1b2c…-uuid moderator`
kick / mute / ban	`kick playerUUID seconds reason`	Moderate (same syntax for mute and ban)	Owner; moderator: kick, mute	`mute 1b2c…-uuid 3600 Spamming trade chat`
unmute / unban	`unmute playerUUID reason`	Lift a mute or ban	Owner; moderator: unmute	`unban 1b2c…-uuid Appeal accepted`
start_location	`start_location x z`	Set the new-character start	Owner	`start_location -240 150`
resolve_report	`resolve_report reportID`	Mark a report resolved	Owner, moderator	
delete_chat	`delete_chat messageID`	Remove a chat message	Owner, moderator	

* Moderators see a shorter help list: players, kick, mute, unmute, delete_chat, resolve_report. Only those (plus listing commands that need no server permission) work for them.

◆ 11.2 What the console buttons send to the server

Every button in the console sends a named command with a set of fields (a "payload") to the server's owner command function. This table is for troubleshooting and for reading the Audit log — the names below are what you will see in the *action* column there. Most of them cannot be typed into the Terminal (which only accepts the commands in 11.1).

Command	Payload fields	Used by
`give`	userId?, item, amount, destination (inventory|bank)	Players → Give; Spawn → item buttons; Items library
`console_give_xp`	userId, skill, amount (1–5,000,000)	Players → Give XP
`setskill`	userId, skill, level	Players → Set level
`console_max_player`	userId	Players → Max out
`heal`	userId	Players → Heal
`bring`	userId	Players → Bring to me
`console_goto_player`	userId	Players → Go to player

Command	Payload fields	Used by
`teleport`	x, z, userId?	Teleport player / Teleport me / travel buttons / Go to
`kick` `mute` `unmute` `ban` `unban`	userId, reason, seconds	Players → Moderation
`role`	userId, role (moderator|player)	Players → Save role
`spawn`	template, kind, x, z, yaw, name, level, hp, … (all entity fields)	Spawn, Editor
`console_bundle`	name, entities[1–80]	Spawn → bundles
`update`	id + changed fields	Placed, NPCs, Monsters editors
`delete` `restore`	id	Placed, NPC/Monster delete
`console_group`	group, op (move|rotate|delete|restore), dx, dz, degrees	Placed → Group tools
`actor_respawn` `actor_freeze` `actor_unfreeze` `actor_delete` `actor_restore` `actor_update` `goto`	id (+ stats for actor_update)	NPC/Monster headers, Actors tab
`console_live`	—	Dashboard tiles, live lists (read only)
`console_heal_all`	—	Heal everyone online
`console_respawn_all`	all? (true = reset every creature)	Respawn defeated / Reset every creature
`console_clear_drops`	x, z, radius (1–500)	Clear drops
`console_broadcast`	text, minutes (1–240)	Broadcast
`welcome` `announce`	text	World / Terminal
`maintenance`	enabled (true|false)	Maintenance buttons
`restart` `cancel_restart`	seconds (15–3,600)	Restart countdown
`start_location`	x, z	New-character start
`resolve_report` `delete_chat`	id	Reports tab
`catalog_item` `catalog_recipe` `reset_build`	item / recipe definition; id	Items, Recipes, Editor
`quest_list` `quest_save` `quest_archive`	quest definition; id	Quests tab, Terminal

◆ 11.3 Browser developer console

The game exposes `window.eldervaleRealm` in the browser's developer tools (F12 → Console). Its `command(name, payload)` method sends **player gameplay** commands for *your own* character — the same ones the game sends when you click — for example:

```
eldervaleRealm.command('run', {enabled: true})     // toggle running
eldervaleRealm.command('jump')
eldervaleRealm.command('stop')
eldervaleRealm.command('equip', {slot: 'weapon', key: '<weaponKey>'})
eldervaleRealm.command('drop', {item: '<itemID>', amount: 1})
```

Other gameplay command names found in the client: `move`, `pickup_drop`, `attack_style`, `fish`, `woodcut`, `cook`, `pray`, `skill_start`, `skill_cancel`, `skill_harvest`, `skill_consume`, `consume`, `stairs`,

`trade_request`, `trade_join`, `trade_offer`, `trade_accept`, `trade_cancel`, `quest_accept`, `quest_complete`, `preview`, `reset`.

> **⚠ NO OWNER COMMANDS IN THE DEVELOPER CONSOLE**
> Owner and staff commands (give, teleport, spawn, kick, ban, max out …) are **not** available through `eldervaleRealm.command`. That method talks to the player gameplay server function; owner commands go through a separate owner function that the console calls internally and that is not exposed on `window`. A call such as `eldervaleRealm.command('give', {userId:'…', item:'gold', amount:1000})` will **not** give gold. Use the console's buttons or the Terminal tab (`give gold 1000 <playerUUID>`). Avoid typing gameplay commands by hand unless you know what they do.

◆ 11.4 Chat commands

Type in chat	Effect
`/coords`	Toggle an X / Z position read-out at the top of the screen. Also accepts `/coord`, `/coordinates`, `/position`. Add `on` or `off` to set it explicitly (e.g. `/coords on`). The setting is remembered in this browser.

No other slash commands exist; anything else typed in chat is sent as a normal message (up to 240 characters, one message every 2.5 seconds).

◆ 11.5 Keyboard shortcuts

Key	Action	Who
`F8`	Open / close the Game console (or Moderation center)	Owner, moderators
`Esc`	Cancel click-placement or select-in-world; close menus and panels	Everyone
`Enter`	Open chat and focus the message box	Everyone
`W` `S` / `↑` `↓`	Move forward / back	Everyone
`A` `D` / `←` `→`	Turn left / right (strafe while holding the right mouse button)	Everyone
`Q` `E`	Strafe left / right	Everyone
`E` (near stairs)	Use the stairs	Everyone
`Space`	Jump	Everyone
`Shift` (hold)	Sprint	Everyone
Left + right mouse buttons	Walk forward	Everyone

12. Tips and troubleshooting

Problem	What to do
The console button is missing	Make sure you are signed in with the owner account and the world has finished loading. A newly promoted moderator must reload the game to get the button. Press F8 to try opening it directly.
New features don't appear after an update	Do a **hard refresh**: `Ctrl`+`Shift`+`R` (Windows/Linux) or `⌘`+`Shift`+`R` (Mac). Every game file is loaded with a release tag (currently `release-20261105-cap99v62`); if a hard refresh does not help, clear the site's cached files in the browser settings and reload. On phones, close the tab fully and reopen.
Red error in the status line	Read the message — it comes from the server and usually names the limit (e.g. “Quantity must be 1–1,000,000”, “Keep patrol waypoints within 45 m of the NPC”). Fix the value and retry. Nothing was changed when an error is shown.
“Wait for the current command”	A previous button is still saving. Wait a moment and click again.
“Owner access required” / “This command requires owner access”	You are not signed in as the owner, or a moderator tried an owner-only action.
“Inventory full…”	The target's 16-slot backpack has no room. Choose Bank, or a smaller quantity.
“Unknown command” after a server update	The database may be missing a newer migration. The console falls back for bundles (spawning pieces one by one), but other features need the server update applied by whoever maintains the database.
“World limit: archive an entity first”	2,000 active placed entities reached. Delete unused objects.
Live data unavailable on the Dashboard	The live feed failed; tiles show local data only. Check your connection; it retries every 5 seconds.
Something was changed by mistake	Deleted things: Placed → Deleted → Restore. Edits: open Audit, find the action and read the “before” values, then re-enter them. Export the audit as a record.
A player says a grant didn't arrive	Offline grants arrive on next login. Online players receive them within a few seconds; if not, ask them to reload.
Spawned in the wrong place	Use Placed → Move by clicking…, Move to my position, or the arrow pad; or Delete and spawn again.
Terrain or fishing spot refused	Terrain must be on dry land and 15 m clear of buildings; fishing spots must be within 6 m of water.

✦ GOOD HABITS

- Use maintenance mode for large changes.
- Export the world (Editor tab) before big rebuilds, and the audit log after.
- Test new monsters on yourself before opening an area — use Go to, then fight; reset with Respawn / reset.
- Keep service NPCs (bankers, shopkeepers) stationary so players can find them.
- Keep guards stronger than nearby threats; they fight aggressive intruders.

12.1 What this guide could not verify

- The guide is written from the code and database scripts in the repository. Whether every script has been applied to the live database was not checked (the database was not touched).
- Exact server range for **Set level** on older skills (see 3.5); use 1–99.
- The task brief's figure of “26 monster types” — the code has 25 bestiary creatures and 24 base creature templates.
- That the browser developer console offers *no* owner commands was verified for the client code; no hidden owner API was found on `window`.
- Screen positions of the console button differ between desktop, tablet and phone layouts; “top-left” is the desktop position.
